<b>Office Action Summary</b>	<b>Application No.</b> 10/663,774	<b>Applicant(s)</b> LEE ET AL.	
	<b>Examiner</b> Dung Nguyen	<b>Art Unit</b> 2871	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/2007 has been entered.
2. Applicant's amendment dated 10/31/2007 has been received and entered. Claims 1-30 are pending in the application.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3, 7-10, 13-17, 23-24 and 26-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Zhang et al., US 6,847,422.

The above claims are anticipated by Zhang et al. figure 2W and accompanying text which discloses an array substrate for a liquid crystal display (LCD) device comprising:

- . a substrate 1;
- . a plurality of gate lines having a gate electrode 5b;

- . a plurality of top gate thin film transistors TFTs, each having a gate electrode 5b, a source/drain electrode 10a/10c;
- . an interlayer insulating layer 9;
- . a first gate redundancy line 10b;
- . a passivation layer 11;
- . a pixel electrode 19c.

It should be noted that the method of manufacturing the device is merely a list of forming each component and each component must be formed to make the device, the method of manufacturing would be inherent to the device.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-5, 11-12, 18-19 and 28-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang et al., US 6,847,422, in view of Kitakado et al., US 6,461,899.

Regarding the above claims, although Zhang et al. do not explicitly disclose a bottom gate type TFT using in the LCD device, Kitakado et al. do disclose top gate type and bottom gate type structure is known structures for a TFT manufactured on a glass substrate (col. 1, lines 55-57). Therefore, it would have been an obvious to one having ordinary skill in the art at the time the invention was made to employ the Zhang et al device having a bottom gate TFT since the

Art Unit: 2871

examiner takes Office Notice of the equivalence of a top gate type TFT and a bottom type TFT for their use in the display art and the selection of any of these known equivalents to operate a display device would be within the level of ordinary skill in the art.

***Allowable Subject Matter***

7. Claims 6, 20-22, 25 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung Nguyen whose telephone number is 571-272-2297. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 571-272-1787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
